## About us.

**Our website is a platform for people to donate their old gadgets and excess food to those in need. We believe that by connecting donors with recipients, we can help reduce waste and provide valuable resources to those who may not have access to them otherwise.**

**Our mission is to create a more sustainable and compassionate community, one donation at a time. Whether you are looking to declutter your home or make a positive impact in your community, we are here to help. Thank you for considering donating through our platform.**
